PNY CS900 SOLID STATE DRIVES
HIGH PERFORMANCE. HIGH VALUE.

Target Market: Ideal for System Integrators or mainstream value consumers looking to get better overall performance and value from their PC or Mac systems.

Based on the latest in flash-based technology, the CS900 is a cost-effective Solid State Drive designed to help speed up the performance of both PC or Mac desktops and laptops. Offering a faster and more energy efficient alternative to traditional hard disk drives, the CS900 is an excellent system upgrade for mainstream value consumers and small to medium businesses ensuring faster boot up time, quick application launch, and a better overall computing experience. Available in capacities up to 960GB in a 2.5-inch form factor, the CS900 has sequential reads/writes up to 550/515 MB/s.

GET MORE VALUE FROM YOUR SYSTEMS WITH THE CS900

- **SPEED:** Superior performance compared to traditional hard drives (HDD).

- **EFFICIENCY:** Do more in less time, boot up, power down, and load applications in seconds.

- **ENERGY SAVING:** Low power consumption, longer battery life for laptops. Minimizes Total Cost of Ownership (TCO).

- **RELIABLE:** With no moving parts, it is highly durable and includes a 3-year limited warranty.

- **ENDURANCE:** Survives in extreme environments, and retains its memory even when dropped.

- **EASE OF USE:** Bonus Acronis® data migration software makes it easy to upgrade from a hard drive.
