

Additional Power Requirements

NVIDIA FX3400 by PNY Technologies

In order for your NVIDIA Quadro FX 3400 by PNY graphics board to operate, the additional **6 pin power cable** must be plugged in (Figure 1). The NVIDIA Quadro FX 3400 by PNY requires a stable, 12-volt power source for best performance and reliability. NVIDIA recommends a power supply with a rating of 350W or higher.

NVIDIA Quadro FX 3400 by PNY graphic board has one PCI Express 6 pin power connector plug on the back end of the card. The 6 pin power cable must be connected for normal use.

Figure 1: PCI Express power configurations for use of the NVIDIA Quadro FX 3400 by PNY (Using PCI Express 6 pin Power Cable).
