

Additional Power Requirements

NVIDIA Quadro FX 700, FX 1000, FX1100, FX 2000, FX 3000, FX3000G by PNY Graphic Boards Only

In order for your NVIDIA Quadro FX by PNY graphics board to work optimally, the additional power connector must be plugged in. Located an unused 4-pin power plug inside your computer system and plug it into the card connector as shown below. The power connector is keyed so that it can only be inserted one way. Please verify the orientation of the plug before insertion.

DO NOT FORCE IT INTO THE CONNECTOR.
