

PowerPack All-in-One Series

Portable Rechargeable Battery
for Smartphones

Live Mobile: Stay Charged

Slender, compact, and lightweight — the PowerPack All-in-One series rechargeable batteries extend the life of your smartphone by up to one full charge*. Convenient built-in Lightning cable for your Apple iPhone (L1500), or Micro-USB cable for your Android smartphone (M1500) keeps your device charged, while the built-in USB connector lets you easily recharge your PowerPack. Know when it's time to recharge with the simple LED indicator, which uses three lights to display the PowerPack's battery level status. The ultra-portable pocket-sized design is small enough to keep with you at all times, so you can stay charged and stay in touch.
