# NVIDIA QUADRO LONG LIFECYCLE PROGRAM

QUADRO PRODUCT LIFECYCLE

Quadro products have always benefitted from NVIDIA's carefully controlled and implemented design, build and test criteria, extended product availability, and fully documented lifecycle notifications. The new NVIDIA Quadro Long Lifecycle Program takes NVIDIA's and PNY's joint Quadro customer commitment to the next level by offering extended software maintenance and hardware availability for up to 5 years beyond the Last Time Sale (LTS) date, for mission-critical Quadro products deployed across enterprises or embedded in customer solutions. Five additional years of critical security updates and bug fixes, plus five years of extended hardware availability, add up to peace of mind – for customers ranging from end-users to IT professionals and systems integrators or OEMs.

LONG LIFE BENEFITS:

EXTENDED HARDWARE AVAILABILITY

Quadro products enrolled in the Long Lifecycle Program (LLP) will be available for up to 5 years after the Last Time Sale (LTS) date. For long-term deployments and design commitments this can be a decisive advantage.

EXTENDED SOFTWARE SUPPORT

The LLP provides critical driver security updates, and urgent bug fixes, for up to five years after the standard Last Time Sale (LTS) date.

PRODUCT CHANGE NOTICES

In the event of any change to form, fit, or function, LLP customers will be notified by the Quadro Product Change Notification (PCN) process. PCNs are issued at least 90 days before the change covered goes into effect.

LAST TIME BUY OPTION

If a key component goes End of Life (EOL), participants may be required to place Last Time Buy (LTB) for the Quadro products enrolled in the LLP:

PRODUCTS ENROLLED IN THE LLP ARE SUBJECT TO			
Product Surcharges	Forecast required upon start of program	250 pc minimum purchase order quantities	18 week lead times after receipt of purchase orders

The NVIDIA Quadro Long Lifecycle Program is currently available on select Quadro models.

Contact your **PNY Account Manager** to determine if your product requirements qualify for the LLP.
