-----------------	--

*For Flash Media Devices, 1 megabyte = 1 million bytes; 1 gigabyte = 1 billion bytes. Actual useable capacity may vary. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.

**Up to 100MB/s read speed, write speed is lower. Based on PNY internal testing; performance may be lower depending on the host devices and user's settings and configurations.
