ARISTA

CLOUD NETWORKING PORTFOLIO

Arista Networks is the leader in building software driven cloud networks for today's datacenter, cloud and campus environments. Arista delivers the most efficient, reliable and high performance Universal Cloud Network architectures based on 10G, 25G, 40G, 50G and 100G platforms delivered with an extensible operating system – Arista EOS®. Arista EOS is built on an open, programmable, and resilient state-sharing architecture that delivers maximum system uptime, reduces CAPEX and OPEX by simplifying IT operations and enables business agility. Arista EOS software offers programmability at all layers, including eAPI, EOS SDK, Linux, DevOps integration, and broad scripting support. Arista CloudVision® software extends the EOS state-based architecture to a network-wide scope with NetDB, a platform for workflow automation, workload orchestration, and advanced visibility. CloudVision's open framework leverages modern APIs and state streaming as the basis for cognitive analytics, including machine learning and artificial intelligence, helping to diagnose and remediate network issues across both wired and wireless networks.

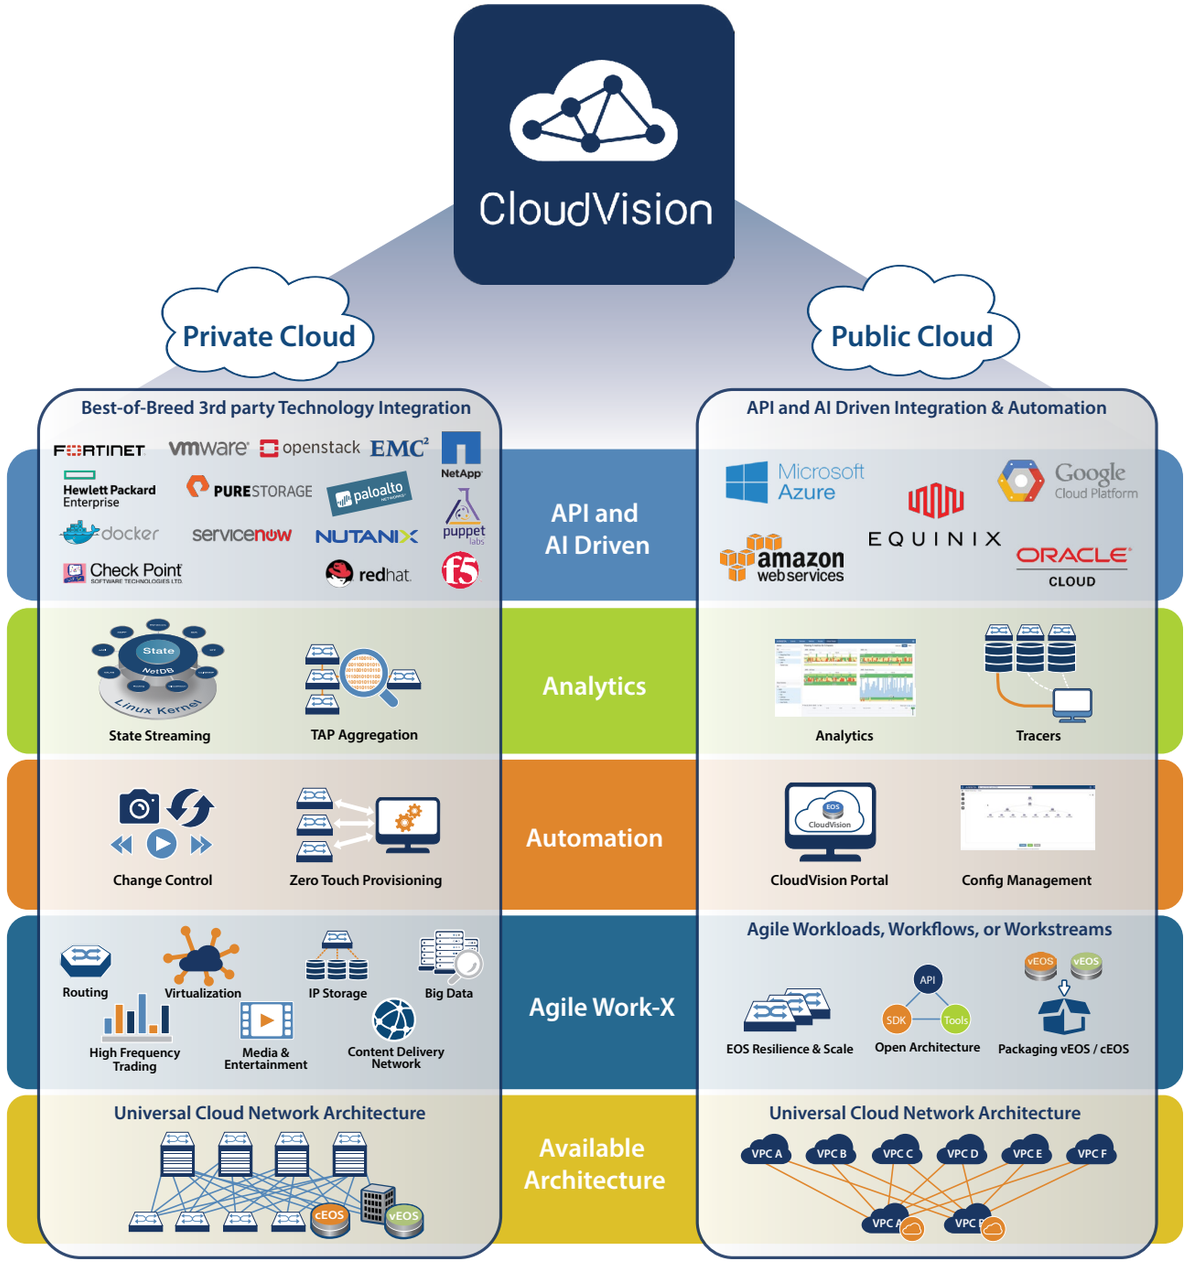
UNIVERSAL CLOUD NETWORK AND ECOSYSTEM



TCO

3x
Savings with faster migration and integration between public and private cloud

10x
OPEX savings using single pane of glass for network automation and analytics into public and private cloud

5x
Cost savings using same operational model for public and private cloud

ARISTA - THE PLATFORM FOR SOFTWARE DRIVEN CLOUD NETWORKING

- Fully programmable platforms allow rapid, automated deployment and provisioning
- Open SDK/APIs for easy integration with third-party and customer extensions
- Single-OS consistency across use cases for every place in the cloud
- Proven solutions and reference designs with a broad best-in-class ecosystem of partners

ANY CLOUD API

SDN Controllers and Security

VMware NSX, OVSDB Controllers, Checkpoint, Fortinet, Palo Alto Networks

DevOps / Network Services

Ansible, Docker, Kubernetes, Terraform

Orchestration/ IT Operations Tools

OpenStack, HPE VMware vCenter, ServiceNow

Big Data Analytics

Splunk Enterprise, VMware Log Insight

Hybrid Cloud

AWS, Microsoft Azure, Oracle Cloud Inrfrastructure, Google Cloud Platform

ARCHITECTURE

High Availability

- Open, predictable and efficient network designs with only modern, open and standards-based protocols using ECMP & VXLAN
- Advanced hitless upgrade/update and auto recovery features with 100% active-active utilization of all bandwidth, resources and links

Scalability

- A state sharing, highly resilient, multi-process architecture that enhances reliability, visibility and scalability
- Supports networks from a few nodes to millions of VMs, containers and end-points at Internet scale and with linear expansion

Efficiency

- Designed to utilize advancing developments in merchant silicon hardware, ensuring a path for customers to new advances in speed, scale and efficiencies with proven investment protection

AUTOMATION

Cloud Automation for Everyone

- CloudVision provides a turnkey automation hub for config and image management, change control simplification, operations compliance, and much more

Zero Touch Provisioning

- Reduce operating costs and time to production with ZTP by eliminating human errors during rack expansion or replacement
- Automate infrastructure scale-out using standards-based mechanisms that are customizable and scripted at any scale

DevOps Integration

- Integrate development and operations workflows with DevOps and CI/CD tools including Kubernetes, Docker, Ansible, Terraform, and others
- Automate network and server management with access to any virtualized, containerized or Linux tool running natively on EOS

ANALYTICS

Telemetry

- Access network-wide control plane and data plane telemetry in realtime and for historical forensic troubleshooting purposes
- Visibility extends to hosts with endpoint inventory and behavior modeling

Tracers

- Enable real-time visibility and automation for highly dynamic, virtualized, containerized, big data and bare metal workloads
- Correlate network health and reachability information with workload placements in the public, private and hybrid cloud

TAP Aggregation and Advanced Mirroring

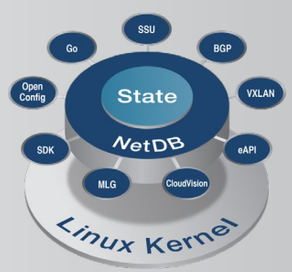
- Get precision access to raw and filtered packet data anywhere and anytime at industry-leading scale with both in-band and out-of-band capture, replication and analysis capabilities
- Generate and analyze high rate sFlow metadata for macro-level visibility into performance trends and security threats

FOUNDATION FOR UNIVERSAL CLOUD NETWORKING

EOS – Open and Extensible Networking Software

- State sharing, highly resilient, multi-process architecture that enhances reliability, visibility, serviceability at any scale
- Built on state-of-the-art NetDB process isolation architecture and continuous development model to enable ease of customer extension, high stability and rapid delivery of advanced features
- At its core, a native unmodified Linux kernel and runtime supporting open APIs, Python, Go, JSON eAPI/SDK, OpenFlow/DirectFlow, AEM event notification, Docker runtime, Linux tools, etc.
- Packaged as bundled EOS on Arista switches, containerized EOS, or virtualized EOS – for any production or simulation use case

ARISTA EOS



CloudVision – A Platform for Cloud Automation and Visibility

- Extends EOS state-based architecture to a network-wide model for provisioning, orchestration, and telemetry
- Unified control point for third party overlay controllers, orchestration systems, and security platforms
- Consistent operations across a broad scope, including campus + datacenter and wired + wireless networks

7130 Applications

Application	Overview	Key Features	Use it for...
MetaWatch	**Advanced network monitoring**	• Tapping • Large scale, lossless tap aggregation • Multi-port data capture • Sub-nanosecond precise time stamping • Deep buffering (32 GB)	• In-depth network monitoring and visibility • Improved network reliability & troubleshooting problems • Market data & packet capture • Accurate latency measurement & monitoring • Regulatory compliance (MiFID II - RTS 25)
MetaMux	**Low-latency multiplexing**	• Data aggregation in 39 nanoseconds • Deterministic jitter • Packet statistics • BGP & PIM support	• Ultra-low latency network connectivity for trading • Market data fan-out and data aggregation for order entry at nanosecond levels
MultiAccess	**Connection sharing with enhanced security**	• Low-latency multiplexing and security in 85 nanoseconds • ACL-based configurable filtering • Easy to deploy data privacy for connection sharing • Simplified footprint for both mux and filtering applications	• Secure network connection sharing • Providing sponsored access to multiple clients • Multi tenant exchange access • Low latency interconnect sharing
MetaProtect™ Firewall	**Low-latency packet filtering in 112ns**	• 48 x 10GbE port network appliance for packet filtering in parallel between port-pairs • Cut-through filtering via 32 ACLs with up to 510 rules per ACL • Architected for ultra-low-latency with packets passing an ACL being forwarded in 112 nanoseconds or less • Comprehensive logging	• Low-latency firewall
SwitchApp	**Low latency Layer 2 switching**	• 1/10/40G Layer 2 switching, implemented in FPGA • Ultra-low latency packet forwarding in 92-130 ns • Full featured L2 switching pipeline powered by EOS • Non-blocking bandwidth profiles to provide up to 480 Gbps	• Multi-layer MLAG-based leaf-spine fabric, incl. redundant connections • Exchange-facing connectivity • L2 Multicast pub/sub • Supporting Colo deployments with multiple concurrent connections • Optimised distribution of traffic • Low latency back-office or message bus infrastructure
ExchangeApp	**Inline timestamping enables exchange fairness**	• Timestamp at the edge of trading venue networks • Sub-200ns passthrough latency to apply the timestamp • Reliable accuracy and timestamp precision • Accurately synchronise timestamps between multiple ExchangeApp devices	• Increase exchange fairness • Reduce trading venue latency sensitivity • Maintain trade order based on edge timestamps • Reduce complexity and risk of traditional low-latency exchange infrastructures

ARISTA

Enabling wireless networks to learn, predict, protect, and progress, Arista's Cognitive WiFi™ solution optimizes the wireless experience. Harnessing the power of the cloud, big data analytics, and automation, Cognitive WiFi augments network admin capacity with the power of intelligence, speed and accuracy. Through root cause analysis and proactive problem resolution options, Cognitive WiFi also reduces the mean-time-to-resolve problems, minimizing troubleshooting effort for the network.

COGNITIVE WIFI 5 ACCESS POINTS

Model Number	C-130/E	C-110	C-100	O-105/E	W-118
Description	Indoor Access Point for the highest performance (voice, video, data), highest density. Persistent RF analysis by dedicated third radio	Most competitively priced indoor Access Point, ideal for low to medium density environments. Persistent RF analysis by dedicated third radio	Most competitively priced indoor Access Point, ideal for low to medium density environments.	IP67 rated, industrial grade Access Point for outdoor and rugged indoor deployments.	High performance, medium density. Low-profile wall plate Access Point, with support for VLAN segmentation and passthrough.
Radio Components	802.11b/g/n radio	802.11b/g/n radio	802.11b/g/n radio	802.11b/g/n Radio	802.11b/g/n Radio

Mesh	Yes	Yes	Yes	Yes	Yes
LTE Interference Mitigation	Yes	No	No	Yes	No
WiFi Alliance Certification	Yes	Yes		Yes	

For complete country certification records, please visit the product certificate page on Arista website.

For Antenna selection for models with external antenna connectors, please see the Antenna Selection Guide

ARISTA

COGNITIVE WIFI 6 ACCESS POINTS

Model Number	C-260	C-230	C-230E	O-235	O-235E
Description	Indoor AP for highest deterministic performance (voice, video, data), ultra-high density. Persistent RF analysis by dedicated third radio	Indoor AP for high deterministic performance (voice, video, data), high density. Persistent RF analysis by dedicated third radio	Indoor AP for high deterministic performance (voice, video, data), high density. Persistent RF analysis by dedicated third radio	Outdoor AP for high deterministic performance (voice, video, data), high density. Persistent RF analysis by dedicated third radio	Outdoor AP for high deterministic performance (voice, video, data), high density. Persistent RF analysis by dedicated third radio
Radio Components	802.11b/g/n/ax radio (2.4 GHz)	802.11b/g/n/ax radio (2.4 GHz)	802.11b/g/n/ax radio (2.4 GHz)	802.11b/g/n/ax radio (2.4 GHz)	802.11b/g/n/ax radio (2.4 GHz)
	802.11a/n/ac/ax radio (5 GHz)	802.11a/n/ac/ax radio (5 GHz)	802.11a/n/ac/ax radio (5 GHz)	802.11a/n/ac/ax radio (5 GHz)	802.11a/n/ac/ax radio (5 GHz)
	802.11a/b/g/n/ac multifunction radio	802.11a/b/g/n/ac multifunction radio	802.11a/b/g/n/ac multifunction radio	802.11a/b/g/n/ac multifunction radio	802.11a/b/g/n/ac multifunction radio
